

2.1.2 Pairing through LauncherPlus Pairing Utility

The **LauncherPlus Pairing Utility** allows you to pair your LauncherPlus directly from this PC software. Please follow the instructions provided in the subsequent list.

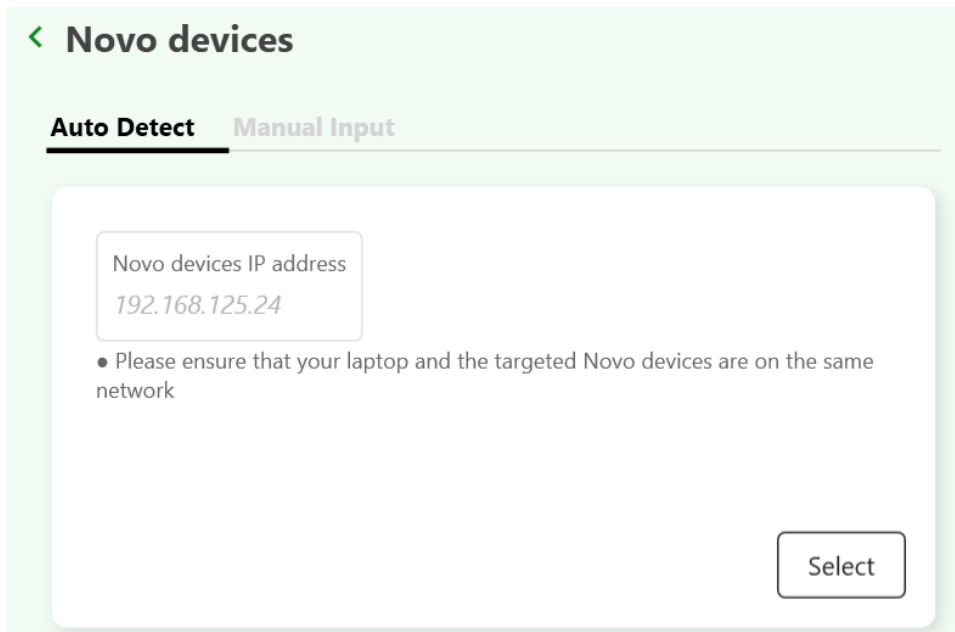

1. Launch the **LauncherPlus Pairing Utility** from a Windows PCs.
2. Plug the LauncherPlus into a PC's USB-C port.
3. On the main page, click the Select button in the Novo devices tab.

There are two ways to designate the target Novo devices: Auto Detect and Manual Input

Auto Detect

– The utility will automatically detect and display the target Novo device's IP address.

The screenshot shows a web interface titled "Novo devices" with a green header. Below the header, there are two tabs: "Auto Detect" (which is selected and underlined) and "Manual Input". The main content area is a white box with a light green border. Inside this box, there is a label "Novo devices IP address" followed by the IP address "192.168.125.24". Below this, there is a bullet point that reads: "• Please ensure that your laptop and the targeted Novo devices are on the same network". In the bottom right corner of the white box, there is a button labeled "Select".

Manual Input:

– Fill in the required IP address, SSID, Security protocol, and Password, then click Save.

< Novo devices
