

2.4 Configuring DS Playlist Settings

To configure DS Playlist's settings including which file folder on your local storage that the playlists are stored on and the interface language, click the **Preferences** button at the top-right corner of the main DS Playlist screen.

In the **Preferences** pop-up menu, the following options are available:

- In the **Playlist and Schedule Folder** section, select **Default** if you want the Playlists created in DS Playlist to be stored in the default folder, select **Customize** and then click the more button to select the folder you want the playlists saved to.
- In the **Language** section, select the language for the DS Playlist interface and then click **Set**.

Once you have configured the settings click **OK** to finish.
