

2. Dashboard

In the home screen you can see the main menu and dashboard parts. We will introduce each main functions in other chapters.

The dashboard includes Organization information, System announcements, device & apps status and firmware distribution.

- Organization: the information includes organization name, ID, current users, storage of cloud service.
- System announcements: you can find new information in here, such as new firmware release, new feature of Remote Manager Cloud, etc.
- Device & Apps: quick to know how many devices is online or offline, how many apps be uploaded to cloud service, how many tasks is running.
- Firmware distribution: show the current firmware version of device. The color represents as below:
 - Green: these devices are up to date.
 - Yellow: these devices slightly behind the latest version but ok.
 - Orange: the devices need a firmware update.
 - Red: these devices urgently need a firmware update.
