

macOS 12 new privacy rules – How to use LauncherPlus on macOS 12

MacBook users can use AirPlay for screen sharing (see the [article](#)) or LauncherPlus.

This article is for macOS new privacy rule on macOS 12 (macOS Monterey), user have to enable some rules on Security Settings on macOS to allow LauncherPlus for screen sharing.

For macOS user still can use AirPlay for screen sharing (see the [article](#)) under the same network.

For macOS 10.15 user(s), please see the [article](#) to modify your privacy settings.

For macOS audio not working please read audio adapter solution (see the [article](#)).

FIRST-TIME USAGE

Step1. Plug LauncherPlus in. For first time use, due to macOS 12 security policy, it will popup a access file message *"LacherDetect would like to access files on a removable volume"*, please click **OK**.

Step2. Under **Security & Privacy > Files & Folders > enable LauncherDetect, Removable Volumes.**

Step3. Click **OK** on *“Launch Novo would like to access files on a removable volume.”*

Click **OK**

Step3. Under **Security & Privacy > Files & Folders > enable NovoConnect Software, Removable Volumes.**

Step4. Popup the Input Monitoring security setting again for Meeting ID/ IP Address/ Meeting Room Name , click **Open System Preferences > Input Monitoring > Enable launchPlusRun > Quit & Reopen.**

Click **Open System Preferences**

Step5. Popup the Input Monitoring security setting again for Meeting ID/ IP Address/ Meeting Room Name , click **Open System Preferences > Input Monitoring > Enable DesktopStreamer > Quit & Reopen.**
