

2.5 Set up a Wi-Fi Hotspot

When there's no any Wi-Fi access point, NovoTouch can be configured a Wi-Fi Hotspot, and create a local network that can be connected directly for each wireless device.

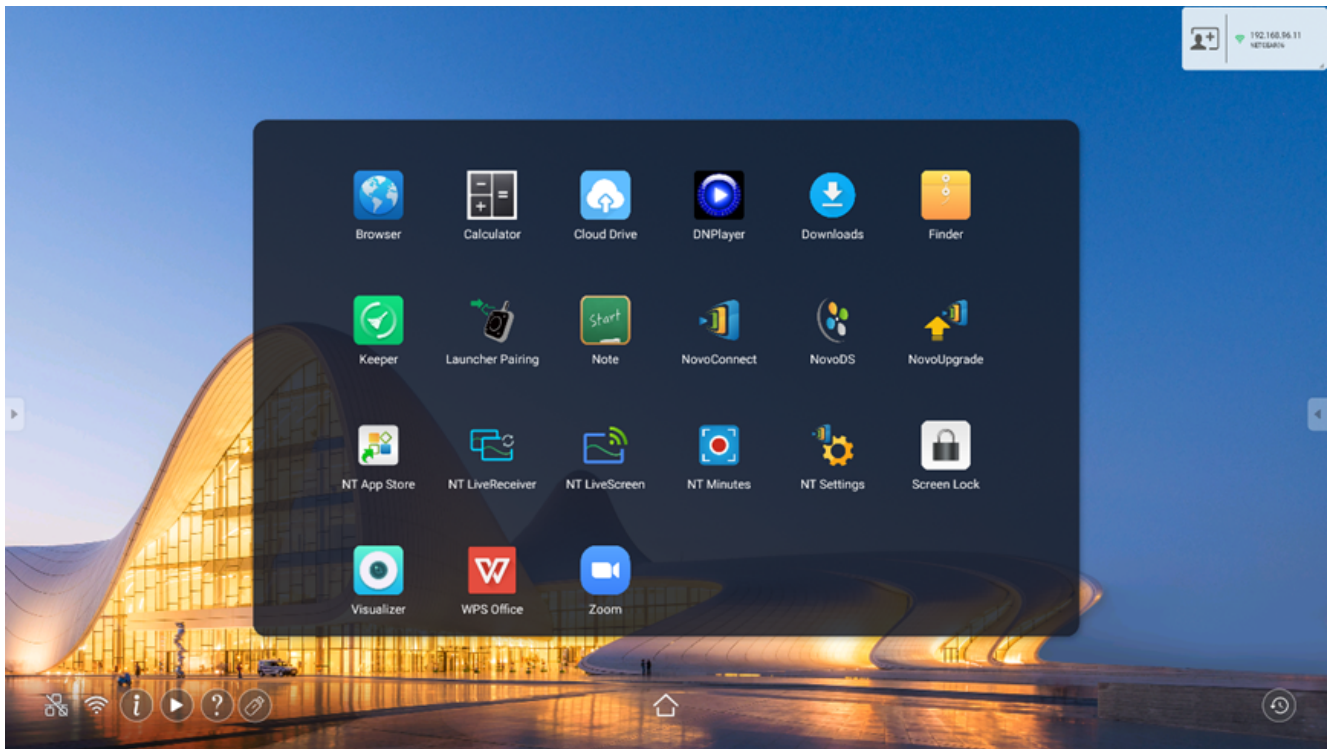

NOTE: When Wi-Fi is configured as a Hotspot, NovoTouch can only access to the Internet via the Lan network which was already connected to the Internet.

Configure Wi-Fi as a Hotspot

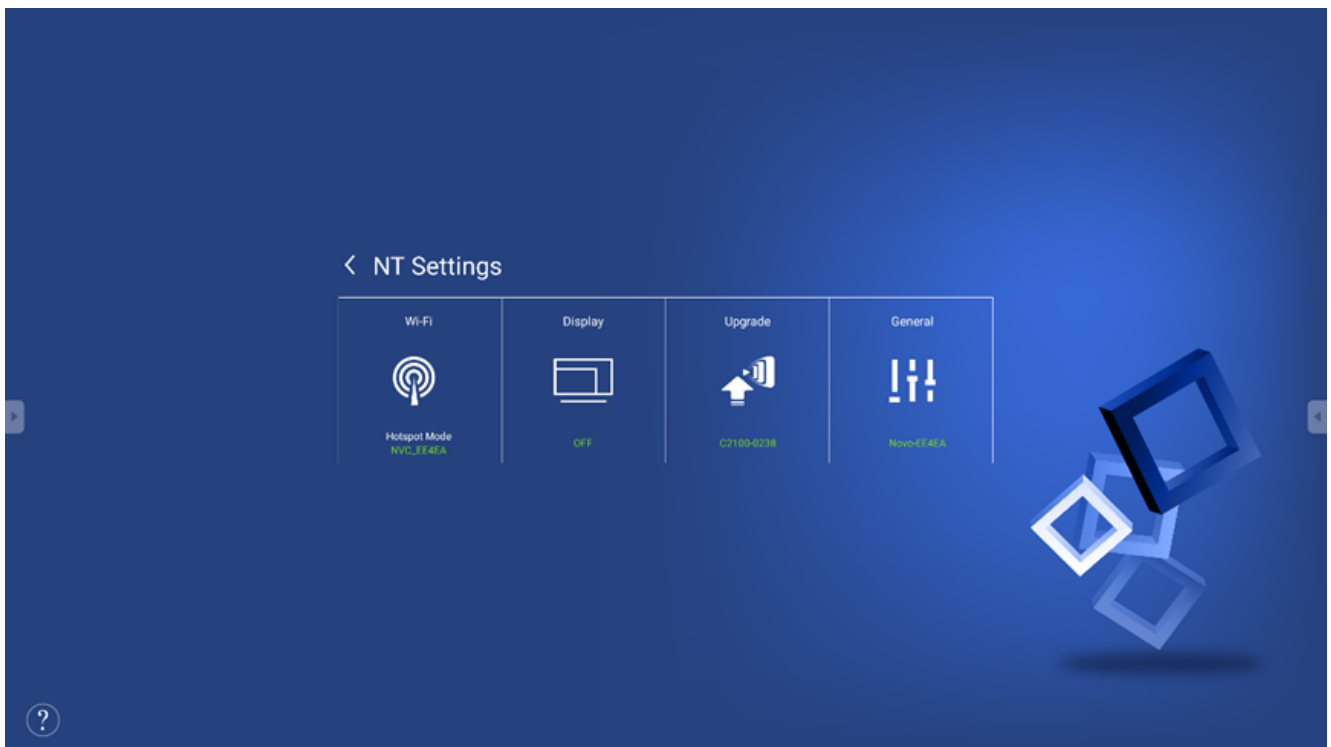

1. Make sure that Wi-Fi module is installed properly. See [Installing the Wi-Fi Module](#).
2. Tap More Apps at the bottom-center of home screen;
2. Tap More Apps  at the bottom-center of home screen; More Apps can also be found by tap the triangle icon at both sides of home screen to enter the Sidebar menu.

3. Tap **NT Settings**.

4. Tap **Wi-Fi** to enter the configuration.

5. Select **Enable Wi-Fi Hotspot** and select the **Wi-Fi Channel** in the drop down menu if it is necessary.

The image shows a 'Wi-Fi' settings screen. At the top, there is a blue header with a back arrow and the text 'Wi-Fi'. Below the header, there are four radio button options: 'Enable Miracast and Turn off Wi-Fi', 'Enable Wi-Fi Hotspot' (which is selected), 'Connect to Wi-Fi', and 'Turn off Wi-Fi'. Under the 'Enable Wi-Fi Hotspot' option, there is a 'Channel' dropdown menu currently showing '5 GHz - CH 40'. Below the channel selection, there is an unchecked checkbox for 'Enable LAN-Wi-Fi-Hotspot routing'. At the bottom of the screen, there are two buttons: 'Apply' and 'Cancel'.

6. Wi-Fi Channels are different in both 2.4GHz and 5GHz frequencies. In some countries or regions, the Wi-Fi Channels may be different. We also provide both 2.4GHz and 5GHz Wi-Fi Launcher, please make sure the Wi-Fi frequency settings is correct for working properly with them.

The image shows a 'Select Channel' dialog box. It has a blue header with the text 'Select Channel'. Inside the dialog, there are two columns of channel options. The left column is titled '2.4 Ghz' and lists channels CH 1 through CH 11. The right column is titled '5 Ghz' and lists channels CH 36, CH 40, CH 44, and CH 48. The 'CH 40' option in the 5 GHz column is highlighted with a green background and a white checkmark icon, indicating it is the selected channel.

7. After the Wi-Fi Channel is selected, tap **Apply** and exit.

NOTE: Check the Enable LAN-WiFi-Hotspot routing box if NovoTouch is connected to a router with Internet access.
